OKTA USER PROVISIONING INTEGRATION WITH SCIM

This document contains:

- 1. Features
- 2. Requirements
- 3. Step-by-step configuration instructions
- 4. Troubleshooting

1. FEATURES

The following provisioning features are supported by Tribeloo:

- Create users: New users created through Okta will also be created in Tribeloo
- Update user attributes: Updates made to the user's profile through Okta will be pushed to Tribeloo
- **Deactivate/reactivate users:** Deactivating the user or disabling the user's access to the application through Okta will deactivate the user in Tribeloo. Deactivating a user means removing access to login, but maintaining the user's information as an inactive user.
- **Remove users:** Users removed in Okta will also be removed in Tribeloo.

2. REQUIREMENTS

SCIM-based user provisioning is available for customers who have the Enterprise User provisioning add-on enabled in the Tribeloo solution.

3. STEP-BY-STEP CONFIGURATION INSTRUCTIONS

1. In Okta, open the Tribeloo app in Admin > Applications and go to the 'Provisioning' tab

okta	Dashboard	Directory	Applications	Security	Reports	Settings
Tril	beloo Act	oeloo Ive 🔻 🔝	L L	View Logs		
General	Sign On	Provisioning	Import Peo	ople Group	DS .	
Provisio	ning					Edit
	E	Pro nable provision creati	visioning is not ning to automate on, deactivation, a	t enabled Tribeloo user and updates.	account	
			Enable Provisio	ning		

2. Click on 'Enable provisioning'

okta

6. Finally on the Tribeloo platform click on the green button 'Enable User provisioning'

FEATURE: CREATE USERS

Check the box Enable to activate the creation of the user in Tribeloo when the user is assigned to the Tribeloo app.

FEATURE: UPDATE USER ATTRIBUTES

Check the box Enable to update the user profile in Tribeloo when the user info is updated in Okta.

Update User Attributes	Enable
Okta updates a user's attributes in Tribeloo when the app is assigned. Future attribute changes mad user profile will automatically overwrite the corresponding attribute value in Tribeloo.	de to the Okta

FEATURE: DEACTIVATE USERS

Check the box Enable to delete the user in Tribeloo when the user is unassigned from the Tribeloo app or when the user is deactivated in Okta.

Click on Save.

4. TROUBLESHOOTING

If you have questions or difficulties with your Tribeloo/Okta SCIM integration, please contact Tribeloo support via support@tribeloo.com.
